

FLOW GUIDE 3-WAY VALVE

Flow Guide 3-way valve

The Flow Guide 3-way valve is an innovative solution developed to meet the specific needs of the rapidly growing aquaculture industry. With over 35 years of experience and direct feedback from facilities in Denmark, Norway, and the United States, Wapro has designed this valve to provide gentle handling and optimal performance in recirculating aquaculture systems (RAS). The valve's construction minimizes the risk of fish injury while ensuring durability and reliability under pressure. In addition, it is easy to operate and install, making integration into existing systems straightforward.

Materials	
Valve body	MVQ Silicone
Inner gasket	EN 1.4404
